

Course Structure

Beneficiary	Value added
Community Based Organizations (CBOs) and Faith based Organizations.	Enhanced skills and knowledge to support practice and policy advocacy.
Media fraternity	Enhanced analytical capacity to engage in critical and investigative reporting on issues pertaining resource governance.
Local Government Authorities (LGAs)	To enhance their knowledge to improve the aspects of governance, quality of decision making process, exercise of power and functioning of the accountability mechanisms.
Regional Miners Associations (REMA)	Enhanced demand driven advocacy and rights in ASM operations.
Community Legal aid providers and Paralegals.	To enhance their analytical capacity in principles of good governance and extractive sector legal framework to monitor compliance of the extractive operations.

About Organizers

HakiRasilimali

HakiRasilimali is a platform of Civil Society Organizations (CSOs) working on strategic issues around minerals, oil and gas extraction in Tanzania. The platform is also affiliated to Publish What You Pay (PWYP), a global membership-based coalition of civil society organizations (CSOs) in over forty countries united in their call for an open and accountable extractive sector, so that oil, gas and mining revenues improve the lives of women, men and youth in resource-rich countries and that extraction is carried out in a responsible manner that benefits countries and their citizens. HakiRasilimali membership to PWYP is an institutional commitment to global transparency agenda.

MS TCDC

MS TCDC is a Training Center for Development Cooperation in East and Southern Africa, situated in Arusha, Tanzania. The Centre was founded in 1967 on the basis of a bilateral agreement between the governments of Denmark and Tanzania. TCDC offers technical assistance and capacity building programs for the state and non-state actors in Africa, Asia, Latin America and the Arab regions to enhance their ability to influence democratic governance, equitable, sustainable and transformative change on the continent. As a training institution, TCDC offers: Academic programs, Short courses, Tailor-made trainings, and Swahili language training and cultural orientation.

Other services offered are: Advisory and consultancy, conference facilities and accommodation.

FUNDAMENTALS OF COMMUNITY LED ADVOCACY IN MINING, OIL AND GAS GOVERNANCE IN TANZANIA

Introduction

The extractive sector in Tanzania is expanding and projected to be a major contributor to the national economy and rural livelihoods. Despite this potential, the sector experiences a range of challenges including environmental, social, cultural, and human rights which all negatively affect equitable sharing of the benefits accrued from the sector. Additionally, there is inadequate knowledge and skills for communities to meaningfully participate in the decision across the value chain of the extractive sector. This demands for industry specific skills and knowledge development for emerging leaders and practitioners who can engage effectively in the extractive sector governance.

Since 2009, there are recipients from Tanzania who have attended extractive capacity enhancement initiatives at regional and global level. For multiplier effects, the alumni have been expected, to apply their competencies and transfer the acquired skills and knowledge to other practitioners in their localities. However, the execution of the said expectation has been limited or redundant. Poor Coordination, organized platform and inadequate resources affect the expected process of transferring the acquired knowledge and skills to others.

To address the above, under the Extractive Sector Knowledge Transfer Incubator Tanzania (ESKi Tanzania), HakiRasilimali and MS-Training Center for Development Cooperation (MS-TCDC) co-created a short course program titled "Fundamentals of Community led Advocacy in Mining, Oil and Gas Governance" that will result in the ability of extractive host communities to push for demand side driven advocacy agendas hence influencing sectoral Policies and Practices.

What is ESKi Tanzania?

ESKi Tanzania is a capacity enhancement program tailored to nurture the next line of community based civil society leaders and practitioners (from the local government authorities, media and other fraternity) engaging in extractive governance to amplify citizen voices in influencing policies and practices in the extractive sector. The program intends to benefit emerging leaders and practitioners who have limited or no prior expert knowledge and experience in the extractive sector governance. Furthermore, equipping them with basic knowledge, skills and tools to enhance their engagements with industry leaders, policy makers and other key stakeholders on mining, oil and natural gas governance in Tanzania.

Course Structure

Module	Brief Description
Fundamentals of the extractive industries.	It gives a global and local overview of the principles, key concepts, initiatives, emerging issues and practices in the extractive sector.
Extractives Governance: Part I: Legislative and Institutional Framework Part II: Transparency, Accountability and Integrity in the extractives	The module provides an overview of good governance principles, Constitutional provisions, legislations, Operational policies and guiding the sector. Highlights the importance of transparency and disclosure requirements across the extractive value chain.
Revenue Management in Extractives.	This module focuses on issues of fiscal regime (impact on local level), revenue categorization and streams; collection and distribution; Utilization and Local levy tracking.
Artisanal and Small-Scale Mining (ASM)	This module offers a global concept of ASM, National context, opportunities and challenges; comparative ASM assessment of policies and practices (success and failures).
Extractives and Local Development.	This module offers an overview of the linkages between local economic development and opportunities surrounding the extractive industry.
Human Rights in the extractives.	This module recognizes the potential negative impact of extractives on land, environment and people.
Extractives, Environment and Climate Change.	This module considers the linkages between resource extraction and environmental sustainability by critically looking at how resource extraction impacts on environment and climate change.
Gender and the extractives.	This module examines the fact that the impacts of the extractives industry are experienced differently by men and women (across different age groups).

Community led Advocacy (Policy and practice).	This module sets to equip participants with requisite tools and skills to engage with policy makers, corporations and other key actors at sub national level.
Communication and information dissemination techniques	This module provides participants with skills on how to communicate advocacy using both alternative forms of using traditional and new media.

Overall Objectives

By the end of the training, participants will be able to;
To reduce the gap between theoretical and practical learning in the extractive sectors in Tanzania and facilitate knowledge and skills transfer between industry experts and citizens, especially community leaders from the host communities.

Gain skills and knowledge to be able to articulate key concepts and issues in the extractive sector.

Use acquired skills and tools to advance community led advocacy and enhance synergies within extractive sector spaces for improved policy and practice.

Our Approach

The fifteen-days (15) course deploys a Participatory Adult Learning Approach (PALA) whereby, Swahili and English are the main languages for facilitation.

Methodology

Expert presentations and narrations; Brainstorming, Group discussion and exercises; Questions and answers sessions; Role play sessions; Traditional story-telling, Experts talks, Case studies, Field visits, Videos, animations, mentorship and coaching sessions. Generally, Learning Uptake (Knowledge based sharing - 60%; Experience Sharing - 30%; Networking - 10%).

Targeted Beneficiaries.

With strong gender consideration the ESKi Tanzania program targets practitioners from the extractive sector host community as described below;
